

We are becoming One brand, One Group, One Team

In the past we have created CTI group – an entity with the vision of connecting three high quality manufacturers – Chirana T. Injecta, Vitrex Medical and Chirmax (Chirana T. Injecta, CZ). Each company is an expert in its own, individual field and each company has its own individual profile, history and culture. The intention of the group was to create an overall joint profile, allowing the good reputation of the individual companies to reflect on all the companies in the group and make the CTI group logo a stamp of excellence.

The group name has served its role to bring the three entities closer together and today we are ready to become “One Group, One Team” with the intention to even further enhance our product offering and improve how we serve our partners to better meet the needs of end-customers.

In result as of November 2024 we are becoming the VMG Vitrex Medical Group. The goal of the group remains the same - to develop and distribute healthcare products of high quality. The vision of the group has since changed and instead of being a group of individual companies, the vision is to create “one team” by integrating the companies’ in terms of strategy, values, departments, processes, know-how and capabilities.

With the new vision in place, it also required a new logo, a new name under which we all will be operating as one. The goal was to create a strong group name also representing the heritage of all group companies to symbolize the upcoming integration of all three entities:

- Our new logotype is a modern version of Chirana T. Injecta ´s malteses cross - traditional symbol for “precision” and “quality” that we stand for
- The heart element symbolizes “care” – as we are all part of the healthcare ecosystem, and we truly care to help our partners to improve the well-being of the patients
- The “Vitrex” name remains, as it is the brand that our customers and partners trust most. It is authentic and best reflects European manufacturing, premium quality, safety and reliability
- The “Medical Group” helps to underline that we operate in both med-tech and IVD industries

VMG Vitrex Medical Group starts a new era in which we want to establish ourselves as a respected partner in the healthcare industry. How do we want to achieve this? By following simple and courageous steps:

- Becoming a recognized European Medical device and IVD partner of choice for leading blue-chip, IVD and pharma companies in the EU and US, offering reliable and high-quality med-tech solutions.
- Establishing ourselves as an acknowledged regional challenger and a competitive European player in the wound closure market, delivering a portfolio defined by high quality and performance.
- Becoming the preferred partner within laboratory (blood collection and handling), diabetes and injectable drug delivery solutions for professional care, utilizing our efficient and specialized European manufacturing expertise.
- Relentlessly bring to our partners, patients and healthcare professionals solutions which will enhance the quality of care.

THE GROUP COMPANIES STAY AS MANUFACTURING SITES

CHIRANA T. Injecta, Slovakia

CHIRANA T. Injecta is a global, state of the art manufacturer of healthcare products, which was founded in 1935.

In 1947 CHIRANA T. Injecta started manufacturing glass syringes and they have ever since focused on development and production of high quality, disposable syringes, needles and metal tubes for the healthcare sector and med-tech companies.

VITREX Medical, Denmark

Vitrex Medical was founded in 1967, where they started producing resistors for televisions, which later evolved to produce capillary tubes to transport liquids.

With more than 50 years of experience Vitrex Medical has become the largest manufacturer of capillary tubes in the world today by developing equipment, establishing technologies, and optimizing production processes.

CHIRANA T. Injecta, Czech Republic

CHIRANA T. Injecta was founded in 1930. Since the early 1990s they have made substantial investments in upgrading the production resources, enabling the company to offer products of a unique quality.

Their more than 90 years of experience with manufacturing sutures has resulted in top priority within quality control, product development and sutures manufactured in line with state of the art technology.

REBRANDING OF PRODUCT SEGMENTS

Products have been divided into five different product segments that are aligned with our end-customer needs, and each have been rebranded to be in line with our rebranding strategy.

New and higher standards in the diagnostic laboratory field require an improved performance of laboratory products. Vitrex Lab products and accessories are designed to fulfill the requirements of lab procedures, patient's comfort and user's safety. In addition to the comprehensive, standardized range of products, we have developed a large variety of specialized products.

Range of products:

- Capillary tubes and Haematocrit tubes
- Micro-pipettes
- Safety lancets
- Vacuum tubes and Blood collection needles
- Alcohol swabs and Safety containers

Diabetes is a huge global challenge. There are 415 million people with diabetes worldwide and by 2040 every tenth person is expected to have diabetes. An effective treatment also involves as pleasant a treatment as possible. We aim to deliver quality healthcare solutions for diabetics to meet the demand of both professionals and individual patients. All people are different, so it requires a carefully selected portfolio of products.

Range of products:

- Pen needles
- Dual safety pen needles
- Diabetic lancets (safety and standard)
- Insulin syringes

Drug delivery products are used for medical purposes with the intention of diagnosing, preventing or treating a disease or sickness. These products contribute to help improving the quality of life for patients. We offer a comprehensive range of high-quality drug delivery products for the healthcare sector, which vary in intended use and indications for use.

Range of products:

- 2-part and 3-part syringes
- Catheter, Enteral, Perfusion syringes
- Hypodermic needles
- IV administration products
- Examination products

For different specialties, procedures and tissue types within human, veterinary and dental market, Chirmax Surgical provides state of the art surgical sutures and meshes to improve the lives of patients worldwide. Our surgical sutures are manufactured in Europe and each individual production process is subject to strict scientific quality control.

Range of products:

- Surgical sutures, ligatures and meshes
- Veterinary bottles and eye needles
- Microsurgery and cardiovascular sutures
- Antibacterial sutures

Our CDMO solutions enable companies to leverage our advanced European manufacturing capabilities to produce high-quality medical devices under their own brand. We offer versatile capabilities and technologies within glass, plastic, metal and wire processing as well as plastic component molding, assembly, packing, sterilization and finishing.

Examples of CDMO projects:

- Specialty drug delivery cannulas
- Pre-fill syringe cannulas
- Plunger rods for PFS
- Capillary tubes for IVF procedures
- Medical procedure kits for e.g. vaccination

VISION

As VMG Vitrex Medical Group, we strive to be the leading European medical device & IVD manufacturing group, developing, producing and supplying high-quality healthcare products and tailor-made med-tech solutions that embody special expertise, reliability, trustworthiness and are made with respect and dedication to enhance the life of healthcare professionals and their patients worldwide.

VALUES

Quality

We are putting high demands both on ourselves and on our business partners to supply only top-quality products to healthcare professionals and their patients.

Customers first

We go to great lengths and are flexible in order to meet our customers' expectations and needs and choose our partners with the same values.

Trustworthiness

Trustworthiness is the foundation of our relationships with customers, colleagues, and partners, creating an environment where respect and reliability drive long-term success. We honor our commitments, communicate openly, and hold ourselves accountable to the highest ethical standards.

Sustainability and Responsibility

We will demonstrate ethical, environmental, financial and social responsibility to build a better life. We are dedicated to making a positive impact by operating responsibly and fostering sustainable practices across all aspects of our business. We prioritize environmental supervision, ethical decision-making, and accountability to our communities, aiming to create long-term value that benefits future generations.

Teamwork

Together we achieve more by driving greater efficiency, and value creation for our customers and end-users. We succeed as a unified team, committed to collective success and mutual support.

Best regards,

Marcin Sieczek

CEO & Member of the board
